SUMMARY

I am currently a fourth-year Computer Science student actively seeking internships to apply and enhance the skills and experiences I have gained in developing and implementing software applications. I have significant experience with python through working on real-world projects. I also have experience with Machine Learning, Tableau, and Power BI, and am proficient in debugging, coding, , Git, GitHub, and DevOps tools. My most recent interests include data warehousing and working with SQL.

EDUCATION

Bachelors Of Computer Science, **Higher Technological Institute** **Sep 2021- Jul 2025**

Specialization: Data Science

EXPERIENCE

Artificial Intelligence Engineer Intern | Instant, Egypt **July 2024 – October 2024**

- Focused on machine learning fundamentals, including supervised and unsupervised learning techniques, and explored
- Developed a strong foundation in Python programming for artificial intelligence and machine learning.
- Enhanced problem-solving skills and gained practical experience in data analysis and data preprocessing for AI projects.

advanced deep learning models like Artificial Neural Networks (ANNs).

- Specialized in deep learning frameworks and worked with advanced neural network architectures, including Recurrent Neural Networks (RNNs),

Artificial Intelligence Engineer Intern | NTI (National Telecommunication Institute), Egypt **May 2023 - July 2023**

Convolutional Neural Networks (CNNs), and Generative Adversarial Networks (GANs).

- Implemented projects in image recognition, speech recognition, and time-series forecasting using Python.
- Gained hands-on experience in computer vision, data augmentation, and model optimization for real-world AI applications.

PROJECTS

January, 2025

- **USA Airline Delay Cause Prediction**
  - Objective: Predicted causes of airline delays across the USA with an accuracy of 99%.
  - Approach: Utilized Artificial Neural Networks (ANN) to predict causes of airline delays, optimizing the model's performance and identifying key factors .
  - Tools & Technologies: Python (e.g., Scikit-learn, Pandas), visualization tools like Matplotlib.

- **Heart Disease Project**
  - Created a predictive model for heart disease utilizing age, sex, chest pain type, blood pressure, cholesterol, and other health indicators.
  - Employed machine learning techniques to analyze data, assisting medical professionals in making informed decisions and improving patient outcomes.
  - Tools: Machine Learning (Logistic Regression, Random Forest Classifier, XGBoost, ANN, CatBoostClassifier, BaggingClassifier, SVC, AdaBoostClassifier) , Pandas, seaborn.

Oct 2024

- **Titanic - Machine Learning from Disaster Project**
  - Built a predictive model to determine passenger survival on the Titanic based on features like age, sex, class, family size, and embarkation port.
  - Applied and compared multiple classification algorithms, improving model performance and gaining insights into survival factors.
  - Tools: Machine Learning (Logistic Regression, Random Forest Classifier, XGBoost, CatBoostClassifier, SVC, AdaBoostClassifier, BaggingClassifier, Gradient Boosting Classifier, K-Nearest Neighbors (KNN), Decision Tree Classifier, Naive Bayes, Extra Trees Classifier, LightGBM, ANN), Pandas, Seaborn, Matplotlib

MAR 2024

- **Retail Sales Analysis Project**
  - Conducted an in-depth analysis of a retail sales dataset to identify trends, seasonal patterns, and key factors affecting sales performance.
  - Leveraged data preprocessing, feature engineering, and visualization techniques to derive actionable insights for improving business strategies.
  - Tools: Pandas, NumPy, Seaborn, Matplotlib

oct 2024

Diwali Sales Analysis Project

- Analyzed a Diwali Sales Dataset to uncover consumer purchasing patterns, demographic influences, and high-performing product categories during the festival season.
- Applied feature engineering, data visualization, and statistical analysis to derive actionable business insights for maximizing profits.
- Tools: Pandas, NumPy, Seaborn, Matplotlib.

CERTIFICATIONS

- **Completed Training in Instant company**
- **Master Python for Data Science on LinkedIn**
- **Machine Learning on DeepLearning.AI**
- **Databases and SQL for Data Science with Python**
- **Introduction to Statistics in Python on Data Camp**

SKILLS

- **Programming Languages: Python, SQL Deep Learning & Machine Learning: TensorFlow, Python (Scikit learn, Numpy, Pandas, Seaborn,OpenCv).**
- **Data Science & Miscellaneous Technologies: Data science pipeline (cleansing, wrangling, visualization, modelling,**
- **interpretation), MySQL, Tableau, Power BI, Statistics, Time series, Hypothesis testing, OOP, Excel, Web Scraping. DevOps**
- **Soft Skills: Problem-Solving, Time Management, Effective Communication, Continuous Learning, Collaboration.**
